

June 8, 2000

I wish to register my comment on Docket No. FV00-929-2 PR, regarding the proposed establishment of marketable quantity and allotment percentage under the Cranberry Marketing Order.

After reading the proposed options for calculating cranberry growers' sales history, I would like to voice my opinion for the USDA Option 1 as defined by the Agricultural Marketing Service. This option would use an allotment of 71% of a grower's best single sales year in the past six years. I strongly feel that this is the most equitable method of calculation for the most growers.

Thank you for recording and considering my comment on this important decision.
